Certified Correct,

Shelley Webber
AVICC Executive Coordinator
Good morning. Thank you for this opportunity to provide an update of UBCM’s work on behalf of BC local governments and our First Nations members.

I want to extend my appreciation to the communities of Parksville and Qualicum Beach for hosting this year’s conference. It has been some years since I last visited your communities, and I am glad to be back this beautiful part of our province.

It was a pleasure to connect with many of you at last night’s reception. Thank you to UBCM Executive members Larry Cross and Claire Moglove for your hospitality. I also want to acknowledge past presidents Jim Abram and Frank Leonard – it is good to be among friends and familiar faces.

**Strength in Diversity**

The Area Association meetings come at the mid-point of the term for UBCM President, and I find myself mildly shocked to realize the year is half-over.

That’s a reflection of a busy calendar. It also reflects the fact that the role of UBCM President is part of a vibrant, healthy system for local government advocacy.

One of the keys to the health of that system is the diversity of our membership. The Area Associations are part of that, and the composition of our Executive also plays a role.

To see that diversity in action, you only need to look at our last three Presidents. Prior my term, we have had a Mayor from the North, a Councillor from the Lower Mainland, and a Director from the Kootenays. This diversity that keeps us fresh and engaged. Its something also something we need to protect.

Our capacity to welcome and maintain diversity – urban and rural; large and small; from all regions - is a real strength of UBCM.

**Elections Legislation**

In the time available this morning, I want to update you on the key points in UBCM’s work since last Convention, starting with local government elections legislation.

Minister Oakes introduced the legislation two weeks ago, and I joined her at the Legislature to brief the media.

The legislation addresses some but not all of the 31 recommendations delivered by the joint task force four years ago. If you want the fine details, take a look at our Compass article from last week. In a nutshell, the legislation proposes to:

- Establish a four year term;
- Change the election date from November to October effective 2018;
- Provide new rules for third party advertising;
- Tighten up financial reporting; and
- Create a significant role for Elections BC.

The new changes will not impact anonymous contributions of less to $50, so “pass the hat” fundraising will still be permitted.

Last fall, when it became apparent the legislation would not be introduced in 2013, UBCM advised the Ministry to phase delivery to avoid introducing expense limits in an election year.
At our meeting last week, Minister Oakes asked Executive whether or not we supported allowing each community to set their own expense limit through a bylaw. Our response was to reiterate the need for province-wide legislation in this area. We also offered to work with the province to get to find a workable solution.

Once this legislation is passed, the greatest challenge facing the government will be communicating the changes to candidates. November is not far away, and if the new rules are going to be enforced, they will need to be effectively communicated. For those of you who will be running again later this year, I recommend actively investigating the rule changes once they become available to avoid surprises.

**MMBC**

Last fall at Convention, the hottest issue by far was the new recycling program administered by MMBC.

As a result of a resolution endorsed by the membership, UBCM devoted significant resources to this issue. I won’t retrace all the ground that we have covered since then, and will touch instead on where things stand presently.

Based on information provided by MMBC, sixty-seven (67) local governments and thirteen (13) First Nations communities that have executed agreements with MMBC. There are an additional eight (8) communities where MMBC will be providing the service directly to residents. In terms of scope, the program will capture about 73% of the province.

What we are hearing is that opinions vary considerably among local governments regarding the implementation. Some communities are delighted. Others are frustrated, particularly those that did not execute agreements by November 30th and are now on a waiting list. I have also heard that some communities are not getting prompt answers to questions raised as the implementation proceeds.

Last week the Premier announced there are no plans to change or delay implementation of the program. She also acknowledged there were issues, and that the Minister of Environment would engage with those issues.

Our Environment Committee met with Minister Polak last week. What we heard is that the Ministry has increased the staff resources it is providing to oversee the implementation of the program. In practical terms, if your community is not getting timely, clear responses from MMBC, the Ministry of Environment will get involved and get the information you are looking for. Greater provincial engagement is something local governments have been asking for, and this is a welcome step.

UBCM has been granted three seats on MMBC’s Advisory Committee – two voting positions for elected representatives and one non-voting, technical seat designed for staff. Executive is reviewing applications for these roles and will announce our appointments through the Compass in the coming days.

**Building Canada Fund**

I want to touch briefly this morning on the recently announced Building Canada Fund.

UBCM has been liaising with the Province and FCM to emphasize the need to dedicate a portion of funds for local government infrastructure.

Despite the announcement of the program, there are many details that need to be clarified.

At this point we know there is a dedicated portion of funds for small communities. For BC, it would appear the same amount of funds would be available as provided in the last round. However, these funds will be spread over 10 years rather than 7. The funds also will not flow until provincial agreements are signed.
There is even more uncertainty for larger communities who will have to secure funds from the National and Provincial / Territorial components of the program. We understand that applications will require the submission of a detailed business case to Infrastructure Canada.

We will continue to monitor this program, and will direct you to resources as those come available.

Gas Tax Fund

The picture looks considerably brighter for the Gas Tax Fund.

UBCM has been directly involved in negotiations for the renewed program. You know some of the details already. The project categories have been expanded, so you can do more things. An index has also been added to prevent the erosion of the program from inflation. Both points are big gains, and the result of advocacy both by FCM, UBCM and other local government organizations. I am very appreciative the federal government listened to local governments during the Long-term Infrastructure process, and responded with these measures.

UBCM has been at the table to seek additional changes that reflect member feedback through your resolutions, survey responses and consultation.

One of the things we heard is that while it is important to retain a mix of pooled and allocated funding, some want a greater proportion of the funding delivered through the allocated programs.

For those regions that have dedicated regional pools, we also heard there was a desire for more autonomy to make decisions about how to spend these funds. We have taken all of these views to the negotiating table.

The negotiations are down to the final details. We are confident that the agreement will be signed in time to ensure that allocated funds will flow without interruption.

Bringing these negotiations to conclusion remains one of our highest priorities. The renewed administrative agreement promises to deliver $2.6 billion to BC local governments over the next decade. I am hoping we will have some news to announce shortly.

BC Ferries

One of key issues in your agenda this year is advocacy with regard to cuts to the service provided by BC Ferries.

AVICC was quite right in pointing out that there has been very little discussion on the economic impact that will result from ferry cuts. UBCM was pleased to work with you to address that gap, the first phase of which is the policy paper that was discussed in your plenary yesterday.

It is the right thing for us to work with you on this because ferry service is not just an “island” issue or a “coastal” issue - it’s a provincial issue. Ferries are part of the highway system that links all part of our province, and it right to work to protect that system.

I understand that a resolution will be coming forward in your agenda today. If there is a phase 2 in the work, we will join with you in that. I look forward to hearing your discussion.

ALC

One of the topics that attracted considerable discussion at our Executive meeting last week is the Government’s introduction of Bill 24, which proposes changes to the Act governing the Agricultural Land Commission.

Following information that leaked from Government, the Executive met in January of this with Richard Bullock, Chair of the ALC.
Shortly afterward, the Ministry of Agriculture approached UBCM with an offer to consult on the changes that were coming to the ALC Act. The Ministry would not share any policy information with UBCM unless confidentiality agreements were signed, which limited our ability to participate.

Following the discussion by Executive last week, I will be writing to Minister Pimm to say that UBCM is interested in working with the ministry, the ALC and the agricultural industry in developing new regulations that ensure the preservation of farmland and help the farming community. I will also be expressing our dissatisfaction with the Government’s approach to consultation leading up to Bill 24.

We will provide an update once we have heard back from the Minister.

**Mission to Viet Nam**

I want to share a few thoughts with you about our work alongside FCM through their international program.

The federally funded mission aims to build local government capacity in seven countries. For several years, UBCM has been a partner to the *Association of Cities* in Viet Nam.

Our work has focused on building capacity for policy development, advocacy and intergovernmental relations – in short, the bread and butter functions of an advocacy organization.

In March, I travelled along with staff to *Can Tho* for the latest round of the mission. We all know that the translation of knowledge and resources from one culture to another is very difficult. What struck me about the exchange is that the *Association of Cities* is taking the resources we are providing and finding ways to make them come alive in their context. The result has been stronger engagement with their membership, and the delivery of resources they have designed to support economic development.

I came away from the experience believing there is a continued role for Canadian local governments to share what we have learned with peers in other countries. I hope this program will continue over the years to come.

**Strong Fiscal Futures**

Finally, I want to tell you about our Advocacy Days in Victoria last week.

The focus of our outreach was building awareness among MLAs from all parties with regard to the *Strong Fiscal Futures* Report

The report was produced by our Select Committee on Local Government Finance and received unanimous endorsement at the 2013 Convention. The basic message it delivered is that while our finance system is sound at present, there are weaknesses that need to be addressed now to avoid issues a decade down the road. Chief among those issues is the affordability of property taxes for lower income British Columbians.

Last week we met with 30 MLAs, including Ministers Fassbender, McRae, Polak, Anton, Rustad and Oakes.

What we said is that we need to get moving on this initiative through the creation of a joint provincial – UBCM management committee.

Our aim is to see something up and running in advance of the 2014 Convention. We have the Minister’s attention on this issue, and will continue to move this forward alongside the Select Committee.

**Concluding Comments**

Before I go, I want to give a plug for the *Compass*, UBCM’s weekly email newsletter. If you are not yet signed up, you can do on the landing page of our website. What I love about the newsletter is that you can scan the headlines 30 seconds and choose the stories you are interested in with a single click.
That concludes my remarks for today. If you have comments, questions or feedback, I will be available at the back of the room. If we don’t connect today, you can call me any time.

Thank you very much for your time and attention this morning.

INDEPENDENT AUDITORS' REPORT

To the Members of Association of Vancouver Island and Coastal Communities

Report on the Financial Statements

We have audited the accompanying financial statements of Association of Vancouver Island and Coastal Communities, which comprise the statement of financial position as at December 31, 2013, the statements of operations and changes in net assets and cash flows for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management’s Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian accounting standards for not-for-profit organizations, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors’ Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audit is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Association of Vancouver Island and Coastal Communities as at December 31, 2013, and its results of operations and its cash flows for the year then ended in accordance with Canadian accounting standards for not-for-profit organizations.
Report on Other Legal and Regulatory Requirements

As required by the Society Act (British Columbia), we report that, in our opinion, the accounting policies applied by the Association of Vancouver Island and Coastal Communities in preparing and presenting the financial statements in accordance with Canadian accounting standards for not-for-profit organizations have been applied on a basis consistent with that of the preceding year.

ASSOCIATION OF VANCOUVER ISLAND AND COASTAL COMMUNITIES
Notes to Financial Statements
Year ended December 31, 2013

Nature of operations:

Association of Vancouver Island and Coastal Communities (the “Association”) is incorporated under the Society Act (British Columbia) and is exempt from the requirement to pay income taxes. Its purpose is to promote autonomy within local government and to advance the principles of local government. The Association represents the various municipalities and regional districts of Vancouver Island, Powell River and the Sunshine and Central Coasts.

1. Significant accounting policies:

These financial statements are prepared in accordance with Canadian Accounting Standards for Not-For-Profit Organizations (“ASNPO”) in Part III of the CPA Canada Handbook. The Association’s significant accounting policies are as follows:

(a) Basis of presentation:

These financial statements present the financial position, results of operations and changes in net assets of the Association and, as such, do not include all the assets, liabilities, revenue and expenses of the members of the Association.

There is no provision in the accounts for income taxes as the activities of the Association are conducted on a not-for-profit basis.

(b) Cash and cash equivalents:

Cash and cash equivalents are defined as cash and highly liquid investments consisting of term deposits with original maturities at the date of purchase of three months or less.

(c) Revenue recognition:

The Association follows the deferral method of accounting for contributions. Restricted contributions are recognized as revenue in the year in which the related expenses are incurred. Unrestricted contributions are recognized as revenue when received or receivable if the amount received can be reasonably estimated and collection is reasonably assured.

Annual meeting sponsorships, registration and exhibit revenues are recognized as revenue when the conference takes place.

Association dues are recognized as revenue in the year they are earned and collection is reasonably assured.
1. Significant accounting policies (continued):

(d) Contributed materials and services:

Due to the difficulty in determining fair value, contributed materials and services are not recognized in the financial statements.

(e) Financial instruments:

Financial instruments are recorded at fair value on initial recognition. Freestanding derivative instruments that are not in a qualifying hedging relationship and equity instruments that are quoted in an active market are subsequently measured at fair value. All other financial instruments are subsequently recorded at cost or amortized cost, unless management has elected to carry the instruments at fair value. The Association has not elected to carry any such financial instruments at fair value.

Transaction costs incurred on the acquisition of financial instruments measured subsequently at fair value are expensed as incurred. All other financial instruments are adjusted by transaction costs incurred on acquisition and financing costs, which are amortized using the straight-line method (or effective interest rate method).

Financial assets are assessed for impairment on an annual basis at the end of the fiscal year if there are indicators of impairment. If there is an indicator of impairment, the Association determines if there is a significant adverse change in the expected amount or timing of future cash flows from the financial asset. If there is a significant adverse change in the expected cash flows, the carrying value of the financial asset is reduced to the highest of the present value of the expected cash flows, the amount that could be realized from selling the financial asset or the amount the Association expects to realize by exercising its right to any collateral. If events and circumstances reverse in a future year, an impairment loss will be reversed to the extent of the improvement, not exceeding the initial carrying value.

(f) Capital assets:

In accordance with the ASNPO Handbook section 4431, "Tangible capital assets held by not-for-profit organizations" the Association has not capitalized any expenditures during the year. In 2013 there were no capital expenditures (2012 - $nil). Capital assets owned by the Association but which are not capitalized under this policy include furniture, computer hardware and software.
1. Significant accounting policies (continued):

   (g) Use of estimates:

   The preparation of financial statements in conformity with ASNPO requires management to
   make estimates and assumptions that affect the reported amounts of assets and liabilities
   and disclosure of contingent assets and liabilities at the date of the financial statements
   and the reported amounts of revenues and expenses during the year. Actual results could
   differ from those estimates.

2. Cash and cash equivalents:

</tbody>

3. Deferred contributions:

   Deferred contributions consist of $44,665 (2012 - $44,665) of provincial grants restricted for the
   facilitation of the activities of the treaty advisory committee in addition to $6,167 (2012 - $2,000)
   of sponsorship revenues received in advance for the 2014 conference.

4. Contractual commitments:

   The Association has a contract with the Union of British Columbia Municipalities for secretarial
   and office services. Payments under this contract in 2013 were $13,463 quarterly (2012 -
   $13,133). The amounts are subject to adjustment each January.

Other Presentations and Concurrent Sessions

Climate Change – The Problem and Imperative of Our Times
This presentation will examine all aspects of the climate change complex important to politicians, municipal staff and the general public.

After a brief description of climate change history and science, the presentation moves on to look at likely scenarios society faces. The strong possibility that predictions from computer models are too conservative is examined with particular attention paid to the role of "feedback" mechanisms. Next, the presentation reviews problems that climate change presents including: sea level rise, acidification of the oceans, shifting habitats and species extinction, increases in extreme weather events, changing climatic patterns, loss of "glacial water", massive global increase in refugees and shifts in disease vectors.

The presentation concludes by describing transformative changes we must accomplish in our communities including: planning for "adaptive measures" and recognizing the URGENT need to massively address mitigation. The "New Industrial Revolution" and the "non carbon economy" it will create receive particular emphasis.

Presenter: Vic Derman, Councillor, District of Saanich and Director, Capital Regional District

Eco-Assets: Nature’s Role as Municipal Infrastructure

The Town of Gibsons has recognized, formally and in practice, that nature, and the ecosystems services that it provides, are a fundamental and integral part of the Town's infrastructure system. Gibsons is one of the first communities in North America to do so. The Town is blessed with valuable natural assets such as the Gibsons Aquifer which provides high quality untreated drinking water; three major creeks that are a major part of the rainwater management system; and a foreshore area, still mostly natural that protects the area from sea activity. Other natural assets include forested areas, green space and soil.

Natural assets are considered cheaper to operate; can last indefinitely, if properly managed; and are carbon neutral, and in some cases can be carbon positive. It is important to differentiate green infrastructure, which is designed and built to mimic nature, such as a rain garden, from a natural asset such as a creek. Gibsons is also creating sub-categories in asset lists and financial statements to include Eco-Assets and implementing a strategy to manage these assets specifically.

"Ultimately, the Town's goal is to move from simply maintaining infrastructure to a service delivery model, where those services are delivered by the smallest number, the most natural, most energy efficient, and the most reliable municipal assets, that cost the least to operate over the long term.

Presenters: Emanuel Machado, Chief Administrative Officer, Town of Gibsons and Dave Newman, Director of Engineering, Town of Gibsons

Private Managed Forest Land Act

This presentation is an excellent opportunity for delegates to receive an update on the activities, issues and mandate of the Private Managed Forest Land Council. The presentation will include a brief history of the Private Managed Forest Land Act and the Private Managed Forest Land Council. Delegates will learn about such topics as; management objectives on Private Managed Forest Land, legislation & regulations, the difference between private managed land forestry vs. crown land forestry and provide an opportunity to ask questions.

Presenters: Rod Davis, Chair, Private Managed Forest Land Council; Phil O’Connor, Executive Director, Private Managed Forest Land Council

An Overview of Changes to Local Government Election Legislation

This plenary session will provide participants with practical information on expected changes to local government elections legislation (i.e. elections rules that candidates should expect for the 2014 local government elections). The session will feature an introduction from Parliamentary Secretary Linda Reimer, followed by a presentation by Ministry of Community, Sport and Cultural Development Staff who will provide more detailed information on the elections changes expected for 2014. Delegates can expect to hear about such matters as; registration by third-party advertisers, sponsorship information requirements for all election advertising, campaign finance disclosure statements to be filed 90 days, rather than 120, following an election, banning anonymous contributions, creating a role for Elections BC in the compliance and enforcement of campaign finance rules in municipal elections. The session will also provide an opportunity for discussion and question and answers for participants.
