## SELECTED ISSUES

### R26 Rural Tier Two Hydro Rates

### Regional District of Mount Waddington, District of Port Hardy

WHEREAS BC Hydro has adopted a two tiered rate structure to encourage energy consideration with the lower rate threshold based on approximately 90% of the provincial median household consumption of electricity and this average is weighted from the consumption patterns of two-thirds of BC households that are able to use natural gas for their heating, hot water and cooking energy requirements;

AND WHEREAS the BC Utilities Commission (BCUC) reduced the upper price threshold charged by BC Hydro from the requested 1600 kilowatt hours to 1350 kilowatt hours for the bi-monthly billing period and most households in rural and remote communities do not have access to natural gas and cannot reduce their consumption by conservation measures sufficiently to avoid the higher tiered rate;
