Hello Theresa,

Our thanks to President Geselbracht for flagging this for the Ministry of Infrastructure. Unfortunately, the scope of our Ministry is quite limited, as it only focuses on Provincial-led vertical infrastructure projects such as hospitals, schools, post-secondary institutions, and other projects like court houses.

We have included Ministry of Energy and Climate Solutions in this email so that they may respond to you, as Power Supply Investment would fall under their Ministry.

Thank you again for writing and sharing this with us.

Sincerely,

Office of the Honourable Bowinn Ma
